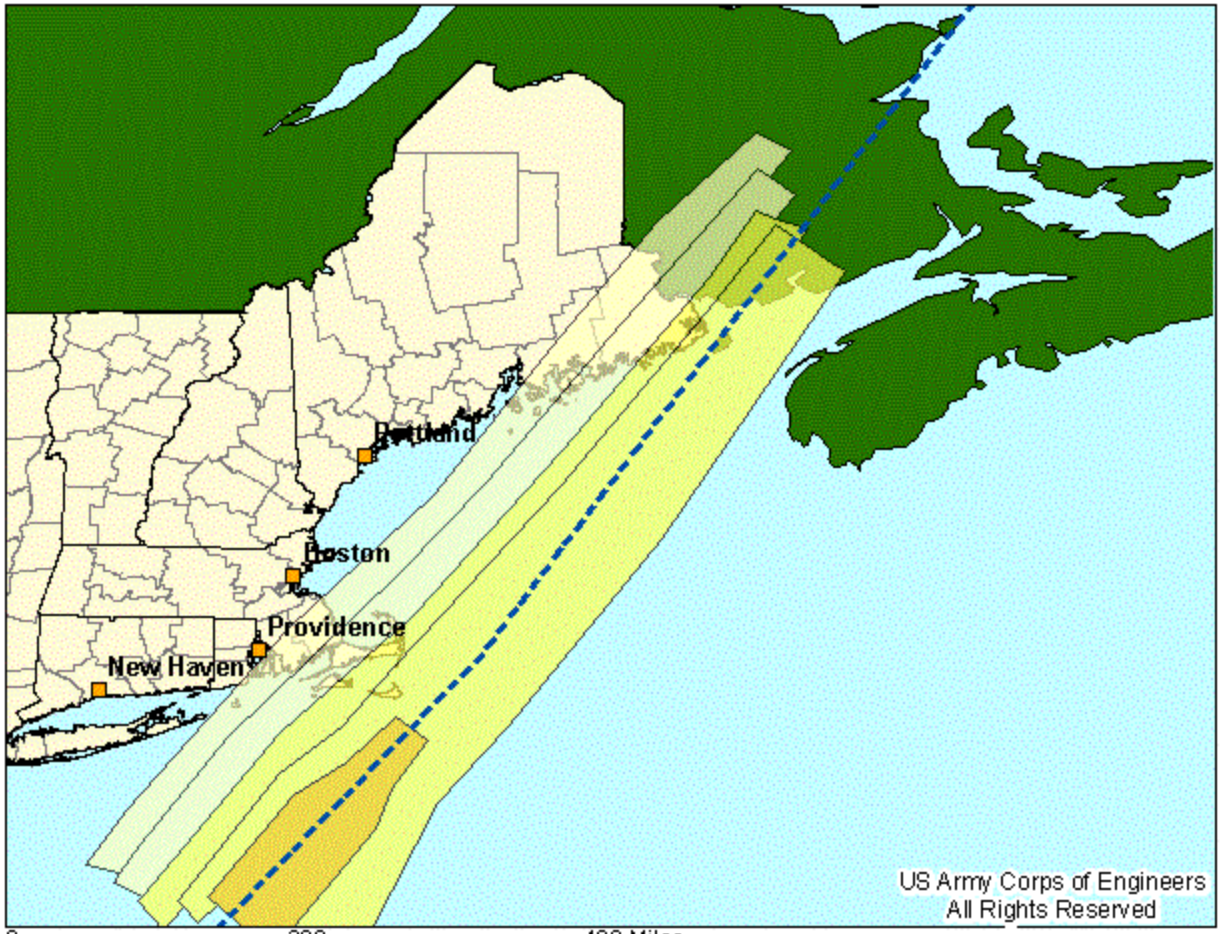
Hurricane Earl Projected Damage Areas

Landfall Expected In About 45 Hours

For Planning Purposes Only!



Post Landfall Projected Damage Areas

This model is based on a Category 2 storm making landfall on coastal New England.

Forecast Track

Projected Damage Areas

- CAT 0-type damage
- CAT 1-type damage
- CAT 2-type damage
- CAT 3-type damage
- CAT 4-type damage
- CAT 5-type damage

Information provided on this page displays a projected or actual Category 2 storm making landfall on coastal New England. These projections are based on information from the NHC (0500 EDT 09/02/2010) forecast and extrapolated by LRL staff to represent a landfall condition that has either occurred or may occur in the near future.

Details about this model may be obtained at http://www.englink.usace.army.mil or contact Louisville District staff at DLL-CELRL-GIS@usace.army.mil

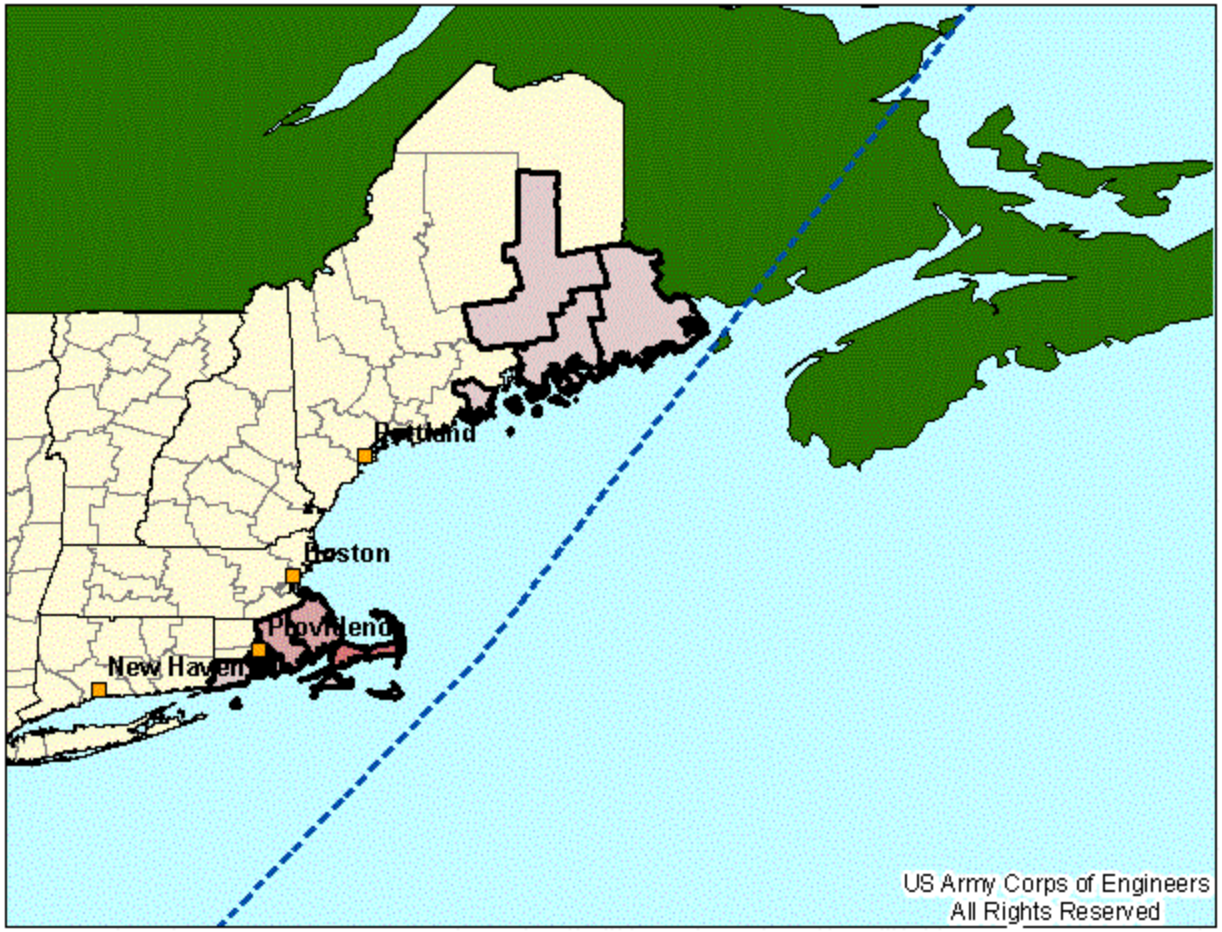
Hurricane Earl Debris Model

Landfall Expected In About **45** Hours

For Planning Purposes Only!



Post Landfall Debris Model Results

Massachusetts - 615,000 Yards
Maine - 95,000 Yards
Rhode Island - 61,000 Yards

Model results per County on following page

This model is based on a Category 2 storm making landfall on coastal New England.

Forecast Track

Debris

- < 100,000 cubic yards
- 100,000 - 249,999 cubic yards
- 250,000 - 499,999 cubic yards
- 500,000 - 999,999 cubic yards
- >1,000,000 cubic yards

Information provided on this page displays a Category 2 storm making landfall on coastal New England. These projections are based on information from the NHC (0500 EDT 09/02/2010) forecast. The amount of debris forecasted is possible total volume, not necessarily the volume that may need to be removed with Federal funds, but does not include volume that may be covered by private insurance. Debris volume may include storm surge generated debris.

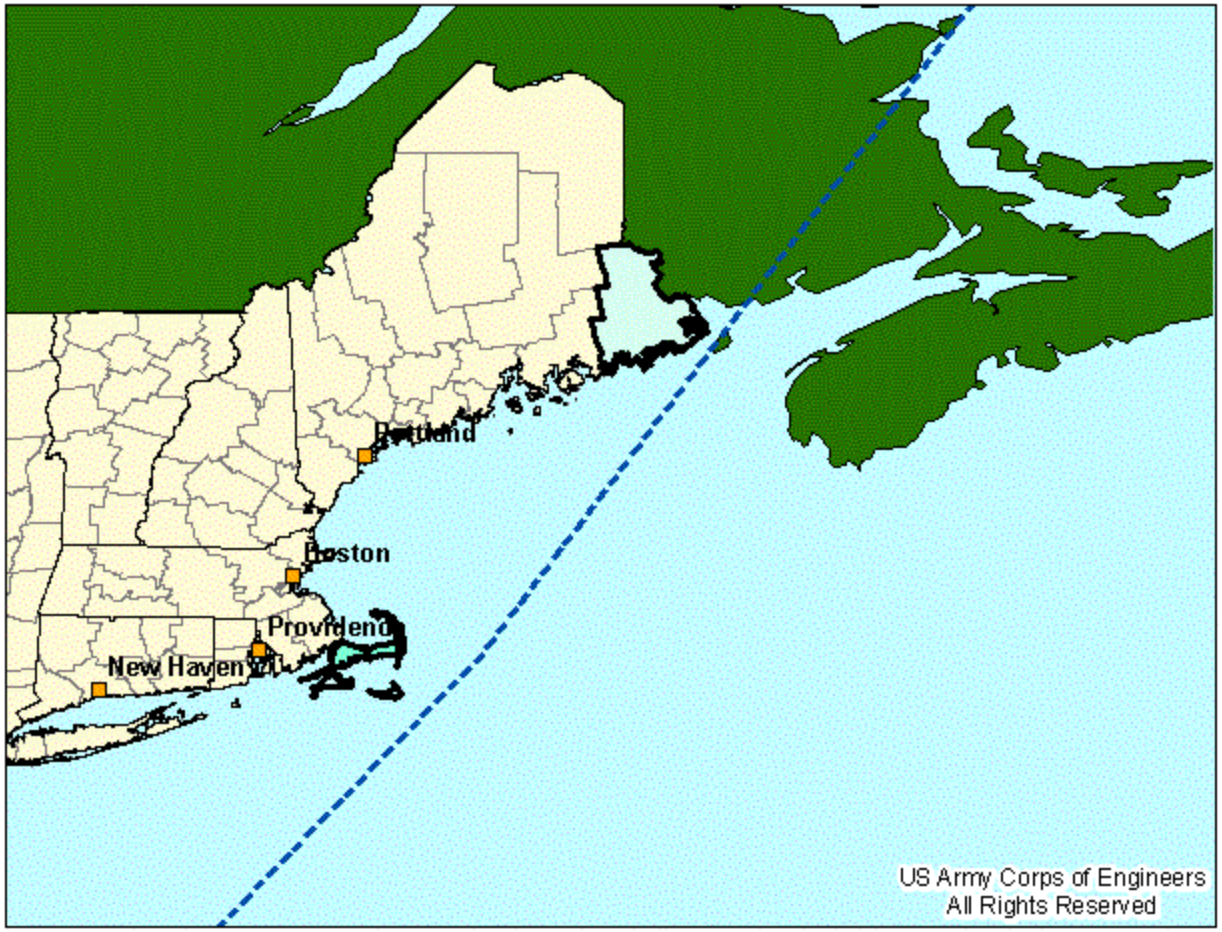
Hurricane Earl Commodities Model

Landfall Expected In About **45** Hours

For Planning Purposes Only!



Post Landfall Water Model Results

Day One / Day Two / Day Three
Massachusetts – 2/4/8 Truckloads
Maine - 1 Truckloads

Model results per County on following page

This model is based on a Category 2 storm making landfall on coastal New England.

Forecast Track

Commodities

- < 5 Trucks Each
- 5 - 10 Trucks Each
- 11 - 20 Trucks Each
- 21 - 40 Trucks Each
- > 40 Trucks Each

Information provided on this page displays a Category 2 storm making landfall on coastal New England. These projections are based on information from the NHC ***(0500 EDT 09/02/2010)*** forecast. The amount of commodities forecasted is based on Mission Guide Book requirements and SME input. The graphic represents daily needs with a ramp-up in the distribution system – three days for Points of Distribution (PODs) to be fully in place and operational. Volume shown is for each commodity – water and ice. Commodity need may be supplied by multiple agencies and/or sources.
